

DDUtil v3 - Release Notes

VERSION: 3.2.4.00

Release date: 2016-4-26

Smart SDR/Cat compatibility: 1.7.20

Introduction

This software is released and intended to be used with the following **FlexRadio Systems** radios:

Legacy – F1500, F3000 and F5000.

Signature – 6300, 6500, 6700 and 6700R.

Additional radios utilizing 3rd party modified versions of **PowerSDR** software may also be used, but without author support or any guarantee of functionality.

Upgrading to this Software Release

This Software Release is available via **DDUtil's** automatic update feature, the **DDUtil** Help menu or from the **DDUtil Wiki** download page.

<http://k5fr.com/DDUtilV3wiki/index.php?title=Download>

This new release may be installed over any existing release without uninstalling or removing any files.

User settings and other files are preserved in special directories other than the install directory.

While **DDUtil** can be installed in any directory it is recommended to use the default directory specified by the installer (C:\DDUtil_V3) for documentation and compatibility purposes.

Please report any bugs/defects to the **DDUtil Yahoo Group**.

<http://groups.yahoo.com/neo/groups/DDUtil/info>

Known Bugs and Limitations

This is considered Beta software and as such may have bugs/defects that can cause your computer to become unstable and/or crash. If you don't feel comfortable using Beta software you might consider using **DDUtil v2** which is considered mature software. But, you'll miss all the fun too.

DDUtil v3 - Release Notes

Defects, Enhancements & New Features

MACRO COMMANDS

- Added **DDFT** (Set AT-AUTO to Fine Tune [requires firmware v2.11 or greater])
- **DD6SRV** (delete slice) no longer throws an error if selected slice isn't open.

See the wiki Cat article for complete usage information.

<http://k5fr.com/DDUtilV3wiki/index.php?title=CAT>

MISC

- Corrected a defect where the Misc Form **Split** function didn't set the **TX** vfo to the **B** slice when enabled.
- Corrected condition where some macro commands would not correctly execute if placed in the **Start-Up** macro.
- Reworked several code routines to not hang if the Internet is not available.
- Added test to make sure the Internet is on-line before using it for Space WX or revision updates.
- Added additional messages for SteppIR direction.
- Fixed Repeater ports VFO B to work correctly.
- Fixed Amp Follows drop-down on Auto Drive tab to work correctly for the F6K radios.

DDUtil v3 - Release Notes

Application Notes

None for this revision.

Troubleshooting

See the **Troubleshooting** section of the wiki for more information.
